

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Pareto Aksje Norge

ISIN: NO0010160575, Unit class A

This fund is managed by Pareto Asset Management AS (org. no.: 977 287 677), a Pareto group company.

### Objectives and investment policy

#### Objective

The fund's objective is to achieve the highest possible return, relative to the risk taken by the fund.

#### Investment Policy

The fund invests in a limited number of shares, selected from the 40-50 leading companies on Oslo Børs (Oslo Stock Exchange). Important selection criteria for the fund's investments are a strong balance sheet, good historical returns on equity and reasonable pricing. The fund is actively managed. This means that the investment decisions are taken on the basis of internal analyses. The investment philosophy can be characterised as long-term and non transaction oriented. We follow sound and well-run companies with a long-term potential and usually invest in 20-30 of them.

#### Benchmark

The fund's benchmark is the Oslo Stock Exchange Mutual Fund Index (OSEFX). The fund will not try to replicate the index and will freely select the securities that it will invest in.

#### Distribution

These units are capitalisation shares. Income and capital gains are reinvested.

#### Recommendation

This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

#### Trading

Subscription and redemption of units may take place each Norwegian banking day, with the exception of 31.12.

The minimum amount for initial subscription is 500 NOK.

### Risk and Reward Profile

The risk indicator was calculated using historical data and may not be a reliable indication of the future risk profile of the fund. The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean a risk free investment.

Pareto Aksje Norge is located in category 6.

The fund is an equity fund. Investing in stocks is typically characterized by relatively high volatility. The fund holds a focused portfolio, and the variation in returns may exceed that of a more diversified fund.

The risk indicator has not necessarily reflected unusual market conditions or major unforeseen events.

The following are risks materially relevant that are not captured by the synthetic risk and reward indicator

Liquidity risk - Insufficient liquidity in a security may make it difficult with a valuation or trade at a given time.

Operational risk - Risk of inadequate procedures or systems, human error, or the fund not being managed in accordance with the investment strategy and risk profile. Pareto Asset Management has established internal procedures to reduce the probability of operating errors.

## Charges

The charges an investor pays are used to pay the costs of running the fund, including the costs of marketing and distributing the fund. These charges reduce the potential growth of the investment.

### One-off charges taken before or after you invest

<b>Entry charge</b>	max 1,00%
<b>Exit charge</b>	max 0,50%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

### Charges taken from the fund over a year

<b>Ongoing charges</b>	1,50 %
------------------------	--------

### Charges taken from the fund under certain conditions

<b>Performance fees:</b>	In the fund's previous financial year, the performance fee was 0,62%
--------------------------	--

The entry and exit charges shown are maximum figures, as in some cases the investor might pay less. Please contact your financial advisor or distributor for the actual entry and exit charges. The subscription fee is subject to an increased charge paid into the fund under special circumstances in order to protect the interest of the unit holders.

The unit class's fixed management fee has been changed with effect from 22 April 2022. Ongoing charges are based on the fixed management fee in the unit class from the above-mentioned date.

The figure of the ongoing charges excludes:

*Transactions costs*  
*Performance fees*  
*Extraordinary costs*

For more information about charges, see Section 2 of the fund's prospectus, which is available at [www.paretoam.com](http://www.paretoam.com).

Performance fee is calculated daily as 15.00 per cent of the relative value development in the unit class compared to the benchmark index, Oslo Stock Exchange Mutual Fund Index, (OSEFX). Performance fee is payable (crystallized) annually per 31 December. The performance fee in a given year is payable only if the accumulated relative value development in the unit class compared to the benchmark index from the previous payment of performance fee, up to and including the given year, is greater than zero. Any underperformance of the unit class compared to the benchmark index is clawed back before any performance fee becomes payable. Underperformance in a given year that is not recovered within five years (the reference period) can be reset. Thus, the total management fee for a given year will never be lower than the fixed management fee.

## Past performance

Returns until 10.07.2015 are achieved in Pareto Aktiv. The fund continues as unit class A in Pareto Aksje Norge post merger.

The unit class was launched in 2002. The fund was launched in 2001. The chart shows the fund's annual performance in NOK, for each full calendar year over the period displayed in the chart.

A new fee model was introduced for the unit class 22 April 2022. The diagram shows the returns achieved with the unit class' previous fee model. Historical return shall be calculated on the basis of the fund's net asset value. The introduction of the current fee model can affect the basis for calculating the unit class' return. Consequently, the return achieved, as presented in the diagram, is not necessarily representative of the current fee model. The performance includes all charges and fees, except for fees incurred on subscription and redemption of units. Historical returns are no guarantee for future returns. Future returns will depend, inter alia, on market developments, the fund manager's skills, the fund's risk profile, as well as fees for subscription, management and redemption. Returns may be negative as a result of negative price developments.
