## What is this product?

### Type

Investment Company (SICAV), Luxembourg

### Term

This sub-fund has no maturity date. However, the board of directors may decide to close the sub-fund under certain circumstances.

### Objectives

The sub-fund aims to achieve the best possible return over the long term, relative to the risk taken by the sub-fund.

The sub-fund primarily invests in equities listed on a stock exchange or other regulated market in the Nordic region.

The sub-fund acquires stocks of companies with no particular focus on an industrial sector or the market capitalisation of companies. The sub-fund is actively managed which means decisions are taken on the basis of internal analysis.

The sub-fund may invest up to 20% of its assets in Fixed Income Instruments which consists primarily in Sovereign Bonds and to a lesser extent in Convertible Bonds.

The sub-fund may use financial derivative (FDI's) for both investment and hedging purposes. FDIs may include futures, forwards, options, swaps (except credit default swaps and total return swaps including financial derivative instruments with similar characteristics), warrants as well as other FDIs the Investment Manager considers appropriate for the sub-fund. The purpose of investing in derivatives will not be to achieve leverage however, transactions in FDIs may leverage the sub-fund due to the leverage inherent in such instruments.

The sub-fund may not invest more than 10% of its net asset in UCITS or other UCIs with similar investment policy.

From time to time, a maximum 20% of the sub-fund's net assets might be invested in liquid assets. Those assets might either be cash deposits or money market instruments.

The sub-fund qualifies as an Article 8 financial product under SFDR since its investment policy contains broad environmental, social, and governance consideration. More information on how the Investment Manager implements ESG issues in its investment analysis and decision-making process can be found at its website <https://www.paretoam.com>.

**Benchmark:** The portfolio is actively managed on a discretionary basis without

reference to a benchmark. However, the sub-fund is managed in reference to the VINX Nordic Equity Index (VINX Benchmark Cap Net Index) for the purpose of marketing only.

## What are the risks and what could I get in return?

### Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

**Be aware of currency risk.** You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: Liquidity risk, derivatives risk, counterparty risk, operational risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.
